

# SPC-100/SPC-114

## Pneumatic Sealless Combination Tool

For use with 25mm or 32mm Magnus® or Apex® steel strapping

### A fourth reverse locking key

Unique to Signode – provides maximum security by preventing joints from opening when impacted from any direction, even when under compression

### No seals to buy and stock

Saves time, money and reduces stock

### Easy to use

Simple two button operation plus a convenient strap loading system

### Easy to service

Sealing mechanism's modular design ensures wear parts are easy to replace

### Lightweight

Significantly lighter in weight than similar tools, minimising operator fatigue and improving productivity and flexibility

### Rugged construction

Offers maximum durability and reliability in demanding, heavy duty applications

# SPC-100/SPC-114

## Pneumatic Sealless Combination Tool

For use with 25mm or 32mm Magnus® or Apex® steel strapping

### Design, function and operation

The SPC100/SPC-114 is a pneumatic sealless combination tool designed for demanding applications such as aluminium ingots, wire/rod coils, plate steel, stamping and cut-to-length operations.

What sets the SPC100/SPC-114 apart from any other comparable pneumatic tool of its kind, is its creation of a sealless joint complete with fourth reverse key lock. This unique feature provides exceptional joint security as it prevents the joint from opening, even when compressed.

Designed for use with either 25 mm or 32 mm x 0.8 mm Signode heavy duty Magnus® or Apex® steel strap, the tool is ruggedly constructed to offer maximum reliability and performance, even in the most demanding applications.

While the seal provided by the SPC100/SPC-114 is every bit as secure as a traditional metal seal, the sealless technology offers a host of advantages – saving the cost and inventory of metal seals and eliminating the need for operators to load magazines. What's more, sealless joints are also flatter, thereby reducing potential indentation damage when loads are stacked.

Operating the SPC100/SPC-114 has also been made as easy and efficient. The tool is equipped with Signode's proven loading method to enable fast insertion of strap and reduce cycle times. The SPC100/SPC-114 is also significantly lighter than other similar tools, reducing operator fatigue.

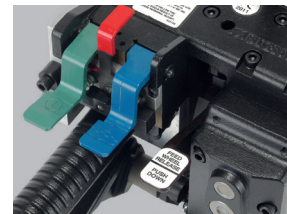

Easy servicing is a further major benefit – thanks to the modular design of the sealing mechanism which simplifies replacement of wear parts and reduces downtime.

### Specification

Joint type	Sealless 4 key
Tension Range	up to 14250 N
Operational pressure	maximum: 6.2 Bar minimum: 5.5 Bar
Weight	16.8 Kg
Dimensions L x W x H	362mm x 159mm x 210mm
<b>Strap</b>	
Material	Apex® and Magnus®
Width	25 - 32mm
Gauge	0.64 - 0.78mm

### Reverse lock

The SPC100/SPC-114 is the only sealless pneumatic combination tool capable of using either 25 mm or 32 mm steel strap to provide the security of a fourth reverse key lock, which prevents joints from opening even if the joint is placed under compression.

### Easy to service

The modular design makes wear parts quick and straightforward to replace.

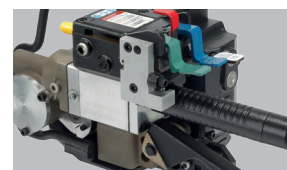

### No seals

Secure, sealless strapping saves time, money and component stocks.

### Reliable and durable

Rugged construction and proven sealing technology ensure the SPC100/SPC-114 performs with maximum reliability and durability in a wide range of demanding applications.

### Easy to load

The easy-to-load strap system speeds operation.

### Lightweight design

The SPC100/SPC-114 is significantly lighter than similar tools, to minimise operator fatigue.
